TIPS FOR CHOOSING THE SIZE OF THE DOG HARNESS

RANGE ONE

The neck circumference should be taken with a flexible tape measure at the lowest point of the neck (see figure below). If the dog's neck circumference measurement is in between two sizes, it is recommended to choose the smaller size. Floating of the harness when stationary (without traction) is completely normal.

Sizes	Neck Circumference	Weight of the harness
XS	38-40cm	143gr
S	41-43cm	151gr
M	44-46cm	158gr
L	47-49cm	193gr
XL	50-52cm	199gr

RANGE STYLE & CONFORT

The **STYLE** and **CONFORT** ranges are measured differently from the **ONE** range.

Choose the size of the harness by taking the chest measurement **A** at the widest part of your dog's ribcage.

RANGE STYLE

Sizes	XS	S	M	L	XL
Chest circumference in cm	49-62	54-68	62-84	68-92	82-120

RANGE CONFORT

Sizes	S	M	L	XL
Chest circumference in cm	54-68	62-84	68-92	82-120

PHOENIX HARNESS

The **PHOENIX harness** meets the most extreme requirements in terms of lightweight and comfort. Due to its tensile strength and performance it is perfectly suited for the use in competition that requires highest quality materials.

Key feature of the **PHOENIX harness** is the use of the form and technology of an X-Back type pulling harness combined with a unique and innovative advantage, that is the possibility of adjusting the **5 essential parts** in order to make the harness perfectly fit the dog's morphology when it is in intensive pulling position.

CANYON WAIST BELT

The **CANYON waist belt** meets the highest demands for lightness and comfort. Its strength and performance are perfectly matched for competitive use, which requires **ideal material qualities**. Its unique design allows it to define an adequate traction point at buttock height, reducing pressure on the lumbar vertebrae and increasing traction transferred to the runner. This belt system perfectly supports the movements of the runner, thanks to the **4 horizontal elastic wings** and the interface for attaching the dog working independently of the locking system.

The **CANYON waist belt** has a zip pocket for storing objects such as smartphones, keys, etc. It consists of an ultra-resistant RIPSTOP outer fabric and a doubled MESH foam inner lining that counteracts perspiration. A **reflective edge** is embedded in the runners harness, making it easily visible at night in difficult lighting conditions. Thanks to a **double loop**, the lashing straps do not come loose even under heavy use. In addition, each of them has **2 rubber bands** to block the excess belt after finding the desired setting. Its **low weight (390g)** allows exceptional results to be achieved while avoiding chafing and disorder. The karabiner used is **ultralight (37g)**, which compensates for the phenomenon of the traction line swinging and ensures a straight pull during the race.

TRACTION LEASH OPALE

The **traction leash OPALE** has been designed taking two criteria into account : the weight and the pulling force of the dog. It comes in 5 products types :

- **3 article variants** with a maximum length of **190cm** (elastically stretched to 100%) for small DOG / medium DOG / strong DOG for use with Canicross and Canitrail.
- **2 article variants** with a maximum length of **240cm** (elastically stretched to 100%) for medium DOG / strong DOG for use with Bikejoring, Dogscooting and Skijoring.

RANGE ONE

X-BACK ONE HARNESS

The **X-BACK ONE** harness is designed to fulfil the requirements of dogs practising an active sport with their owner, such as **CANICROSS, CANIRANDO, CANIVTT...**

The **X-BACK ONE** harness is really light and its design allows it to use the maximum pulling power offered by your dog, while preserving it from the requirements demanded by these activities.

- MESH foam padding for highest comfort
- Durable webbing with reflective inserts for optimal night visibility
- Traction rope with strength of 5mm

The **X-BACK ONE** harness is suitable for the majority of dogs: Nordic dogs, shepherd dogs, majority of hunting dogs, retrievers... It may not be suitable for dogs that have a distinctive rib cage while having a dainty body - for example: type Doberman, Weimaraner, Sighthounds, Great dane, Boxer...

CANICROSS ONE WAIST BELT

The waist belt has a zip pocket to insert items such as a smartphone, keys or other important items.

The waist belt has a wide fit to shape of the runner's back as good as possible. The positioning of the belt must be carried on the top of the buttocks or as low as possible of the dorsal part to optimize the traction of the dog without generating disturbing jolts.

The **CANICROSS ONE waist belt** consists of an ultra-resistant RIPSTOP outdoor fabric and a MESH foam lining that reduces the formation of sweat.

Thanks to the belt clip with quick shutter plus adjustment strap, a large number of users will be able to adjust it to their size.

The **Canicross leash** can be connected to a rope, which is fixed on rings on each side of the belt.

CANICROSS ONE TRACTION LEASH

Designed for regular Canicross practitioners, the leash is practical, light and comfortable for everyone.

The leash is made up of an elastic damping system and remains soft, thanks to the round elastic strap. This system allows to control the jerks while the dog is running. For extreme support the leash has a snap hook with a very high quality one handed quick release system at each end of the leash.

The **CANICROSS ONE leash** measures 150 cm when relaxed and 200 cm when stretched to the maximum, which makes the ONE leash perfectly compliant with the requirements of Canicross federations.

The tubular strap is equipped with a round shock absorber having an optimal hardness. It allows the use for dogs whose weight is higher than 15 kg. Its low weight of 220gr allows it to meet the technical requirements co- developed by Canicross specialists.

RANGE **STYLE**

HARNESS STYLE

The **STYLE harness** is highly technical as well as stylish. It is the ideal accessory for a walk in town, but also for walks in the countryside. This harness has a handle to hold the dog and it is also composed with two fastening rings. It is therefore possible to attach a leash to the top or bottom of the dog.

The **STYLE harness** is equipped with a coupling hook system for use in Canicross, Canirando or for other occasional sporting use.

WAIST BELT STYLE

This belt has a zip pocket to insert items such as a smartphone, keys and other important items.

This waist belt has a wide dorsal seat in order to conform the shape of the runner's back as good as possible. Two adjustable straps are provided to pass through the crotch to keep the belt and the runner's centre of gravity as low as possible when the dog is pulling.

This waist belt is connected to the **CANICROSS traction leash** with a strap, equipped with a movable carabiner. This is a «quick release» carabiner that allows the dog to be released if there is any problem.

Reference number : I11G

Standard Size

Colour : 

CANICROSS TRACTION LEASH STYLE

This leash is composed with an elastic damping system: a soft damping inside the 20mm flat elastic strap. This system allows to control the jerks given by the dog during the race. The leash has a very high quality carabiner for extreme support and two handles.

Reference number : I28G

Standard Size 130/200cm

Colour : 

COUPLER STYLE - ADJUSTABLE TWO DOGS TRACTION SYSTEM

The **STYLE Coupler** is a double coupler to walk two dogs at the same time on one leash. It can also be used during a sports activity with your dog in «traction» mode.

RANGE CONFORT

CONFORT HARNESS

The **CONFORT harness** fits perfectly thanks to numerous adjustment facilities. It adapts the shape of the dog's body and offers him comfort while pulling. An ergonomic handle is placed on the **CONFORT harness** in the dog's back area and ensures a better hold while the dog is resting. The ergonomic high quality **CONFORT harness** guarantees your dog comfort and safety while pulling.

The **CONFORT harness** from **I-DOG** has been created for people who want to practise physical activities with their dog under safe conditions. The features of the **CONFORT harness** provide maximum comfort for you and your dog while running. You will be able to bring maximum comfort to you and your dog during your activities.

CONFORT WAIST BELT

The **Canicross waist belt** features a pocket for a water bottle and two other zip pockets for storing your smartphone or your keys, in order not to lose them!

The **Canicross belt** consists of a wide backrest ensuring a firm hold of the back while running. The **Canicross belt** has two detachable straps for a good hold of the belt and optimisation of the centre of gravity of the runner when the dog is pulling you.

The **Canicross waist belt** is attached to the Canicross leash by a strap featuring a damping system with integrated elastic material. To ensure better tracking of the dog while running, a movable carabiner is fastened to the strap of the lead. The carabiner is equipped with a quick release clip allowing you to release your dog from the lead as quickly as possible in case of emergency.

Reference number :  I10B  I10G

Standard Size

CANICROSS TRACTION LEASH

The leash is equipped with a unique double damping system to control jerking when the dog is running. The elastic strap consists of a 20 cm long flat part (soft damping) and a round elastic strap (harder damping). Two handles are integrated.

Reference number :  I27B  I27P Standard Size 150/230cm

LONG LEASHES

These **CONFORT LONG LEASHES** are available in 5 and 10 meters, are made out of flat polyester and are non-slip. In order to prevent slipping in the hand, the **CONFORT LONG LEASH** provides through its three integrated rubber inserts an effective grip along its entire length. The leash incorporates an elastic strap to avoid shocks caused by jerking dogs.
