TIPS FOR CHOOSING THE SIZE OF THE DOG HARNESS

ONE & ALM RANGE

The neck circumference should be taken with a flexible tape measure at the lowest point of the neck (see figure below).

If the dog's neck circumference measurement is in between two sizes, it is recommended to choose the smaller size.

Floating of the harness when stationary (without traction) is completely normal.

Harness sizes	XXS	XS	S	M	L	XL
HARNESS ONE neck circumference		38-40cm	41-43cm	44-46cm	47-49cm	50-52cm
HARNESS ONE weight		143gr	151gr	158gr	193gr	199gr
HARNESS ALM neck circumference	32-36cm	35-42cm	38-48cm	44-54cm	48-58cm	52-62cm
HARNESS ALM weight	295gr	320gr	330gr	408gr	421gr	433gr

STYLE & CONFORT RANGE

The STYLE and CONFORT ranges are measured differently from the ONE Range.

Choose the size of the harness by taking the chest measurement A at the widest part of your dog's ribcage.

Harness sizes	XS	S	M	L	XL
Chest circumference for harness STYLE	49-62cm	54-68cm	62-84cm	68-92cm	82-120cm
Chest circumference for harness CONFORT		54-68cm	62-84cm	68-92cm	82-120cm

ALM RANGE

PHOENIX HARNESS

— ALM RANGE

The PHOENIX harness meets the most extreme requirements in terms of lightweight and comfort. Due to its tensile strength and performance it is perfectly suited for the use in competition that requires highest quality materials

Adjustments that ensure the connection of the back parts so that the harness fits the dog's body correctly

Adjustment on both sides of the neck to adapt the diameter to the neck of the dog

Refining the lateral connection between the abdominal part of the harness and the upper neck in order to balance the traction force between the straps connecting the upper and lower part of the neck

Adjusting the distance between the two abdominal straps, which, depending on the shape of the chest, provides maximum support and prevents the harness from twisting on one side or the other

Allows adjustment of the belly section so that the harness strap can be positioned well at the level of the dog's ribs.

The materials used for the adjustment buckles are made of flexible plastic and do not cause discomfort or injury to the dog

Durable polyester upper material and MESH foam lining eliminate the effects of sweat

The special feature of the PHOENIX harness is that it is designed like an X-BACK pulling harness in terms of shape and function. In addition, it offers a unique and innovative advantage: adjustment possibilities of the 5 central areas so that it adapts perfectly to the dog's anatomy during intensive pulling work.

CANYON WAIST BELT

— ALM RANGE

The CANYON hip belt meets the highest standards of lightness (390g) and comfort. Its strength and performance are perfectly adapted to competitive use, which requires optimal material properties. Its unique design allows it to define an adequate traction point at seat height, which reduces pressure on the lumbar vertebrae and increases the traction transmitted to the runner.

Ultra resistant RIPSTOP
outer fabric

MESH foam lining
eliminates sweat effects

Ultralight carabiner (37g)
prevents line sway and
ensures straight pulling
direction while running

Thanks to a double loop, the
tension straps do not loosen
even under heavy use. In
addition, each of them has
2 rubber bands to fix the
excess strap after adjustment.

4 elastische Seitenteile, die
perfekt zu den Bewegungen des
Läufers passen. Die Befestigung
des Zugpunktes ist unabhängig
vom Verschlusssystem

A reflective edge is embedded
in the harness, making it easily
visible at night in difficult
lighting conditions

With zipper pocket for
stowing items such as
mobile phone, keys, etc.

OPALE BUNGEE LEASH

— ALM RANGE

The traction leash OPALE has been designed taking two criteria into account : the weight and the pulling force of the dog. It comes in 5 products types :

- 3 article variants with a maximum length of 190cm (elastically stretched to 100%) for small DOG / medium DOG / strong DOG for use with Canicross and Canitrail.
- 2 article variants with a maximum length of 240cm (elastically stretched to 100%) for medium DOG / strong DOG for use with Bikejoring, Dogscooting and Skijoring.

Ultralight carabiner (28g)

Handle on the side of the carabiner to keep the leash as close as possible to the dog, especially when starting a competition

Large suspension, which fits the weight and traction of your dog according to the article number

Long version for Bikejoring

ONE RANGE

X-BACK ONE HARNESS

— ONE RANGE

The X-BACK ONE harness is designed to fulfil the requirements of dogs practising an active sport with their owner, such as CANICROSS, CANI-HIKING, BIKE JORING, ...

The X-BACK ONE harness is really lightweight and its design allows you to use the maximum pulling power offered by your dog to meet the performance requirements of these sports.

The X-BACK ONE harness is suitable for most dogs: Nordic dogs, German shepherds, most hunting dogs, shepherd dogs, retrievers...

ONE CANICROSS WAIT BELT

— ONE RANGE

The wide fit adapts to the runner's back in the best possible way. The positioning of this harness should be above the buttocks or as low as possible on the back to optimise the pulling power of the dog while avoiding jerky jolts.

With its ultra-light weight of 250g the hip belt ONE offers optimal comfort.

The Canicross leash can be connected to a rope, which is fixed on rings on each side of the belt.

Color :

ONE TRACTION LEASH

— ONE RANGE

Designed for regular Canicross practitioners, the leash is practical, light and comfortable for everyone.

The leash is made up of an elastic damping system and remains soft, thanks to the round elastic strap. This system allows to control the jerks while the dog is running.

The CANICROSS ONE leash measures 150 cm when relaxed and 200 cm when stretched to the maximum, which makes the ONE leash perfectly compliant with the requirements of Canicross federations.

Its low weight of 220g allows it to meet all technical requirements. Co-developed by Canicross specialists.

The leash has a snap hook with a very high quality one handed quick release system at each end of the leash.

The tubular strap is equipped with a round shock absorber having an optimal hardness. It allows the use for dogs whose weight is higher than 15 kg. Its low weight of 220gr allows it to meet the technical requirements co-developed by Canicross specialists

STYLE RANGE

STYLE HARNESS

— **STYLE** RANGE

The STYLE harness is highly technical as well as stylish. It is the ideal accessory for a walk in town, but also for walks in the countryside.

This harness has a handle to hold the dog and it is also composed with two fastening rings. It is therefore possible to attach a leash to the top or bottom of the dog.

The STYLE harness is equipped with a coupling hook system for use in Canicross, Canihiking or for other occasional sporting use.

----------------------------	--------------------------	--------------------------	--------------------------	----------------------------

STYLE WAIT BELT

— **STYLE** RANGE

This belt has a zip pocket to insert items such as a smartphone, keys and other important items.

The backside adapts perfectly to the back of the runner.

Two adjustable straps ensure that the seat of the belt does not shift and the runner's centre of gravity is kept as low as possible when pulled by the dog.

This hip belt is connected to the CANICROSS traction leash via a movable snap hook on a strap.

Ultra resistant RIPSTOP outer fabric

MESH foam lining eliminates sweat effects

Zip pocket for keys, cell phone, etc.

Double detachable strap to keep the hip belt in the crotch. Optimises the centre of gravity and offers optimum comfort

This carabiner is a special quick-release fastener so that the dog can be released quickly in case of a problem

Adjustable pull straps

Unique Size

Color : 

STYLE TRACTION LEASH

— **STYLE** RANGE

This leash is composed with an elastic damping system: a soft damping inside the 20mm flat elastic strap.

This system allows to control the jerks given by the dog during the race.

The leash has a high quality carabiner for extreme support and two handles.

Flexible elastic damping system with flat belt

Karabiner with one-hand quick release system

Double handle at each end of the pull line

Reference : I28G

Unique Size **130/200cm**

Color : 

STYLE COUPLER

— **STYLE** RANGE

The STYLE Coupler is a double coupler to walk two dogs at the same time on one leash.

It can also be used during a sports activity with your dog in «traction» mode.

Unique Size

Color : 

CONFORT RANGE

CONFORT HARNESS

— CONFORT RANGE

The CONFORT harness fits perfectly thanks to numerous adjustment facilities.

It adapts the shape of the dog's body and offers him comfort while pulling.

An ergonomic handle is placed on the CONFORT harness in the dog's back area and ensures a better hold while the dog is resting.

The ergonomic high quality CONFORT harness guarantees your dog comfort and safety while pulling.

This carabiner is a special quick release buckle so that the dog can be quickly released in case of a problem.

The CONFORT harness provides your dog with maximum comfort thanks to the adjustable side straps.

These ensure a perfect fit and optimum adaptation to the shape of the dog's body so that he can run unhindered.

Harness made of neoprene material for a pleasant use. Also helps when swimming.

CONFORT WAIST BELT

— CONFORT RANGE

The Canicross belt consists of a wide backrest ensuring a firm hold of the back while running.

The Canicross belt has two detachable straps for a good hold of the belt and optimisation of the centre of gravity of the runner when the dog is pulling you. The Canicross waist belt is attached to the Canicross leash by a strap featuring a damping system with integrated elastic material.

To ensure better tracking of the dog while running, a movable carabiner is fastened to the strap of the lead.

The Canicross waist belt features a pocket for a water bottle and two other zip pockets for storing your smartphone or your keys, in order to not lose them.

The ultralight snap hook (37g) is a quick release fastener with a pull tab for quick release of the dog when needed

The pull strap has 2 rubber bands to fix the protruding strap

Pocket for water bottle as well as two further zipper pockets for mobile phone, key ring etc.

iDog bottle include !

Two removable and adjustable straps to keep the hip belt and thus the runner's centre of gravity as low as possible when the dog is pulled

Reference : I10P  I10B 

Unique Size

CONFORT TRACTION LEASH

— CONFORT RANGE

The CONFORT pulling leash is equipped with a unique double damping system to absorb the shocks of running with the dog through two different types of suspension.

The double damping is the result of combining a 20cm long, flat and softer segment with a round and harder segment. Two handles are also integrated.
