The I-DOG brand products are manufactured by the French company Cano Concept, which specialises in the development of dog accessories. CANO CONCEPT is the owner of the CANIHUNT and I-DOG brands.

Research and development into products with highly technical features and top-of-the-range quality are the factors that drive CANO CONCEPT to be the best in its field.

# | ACTIVITIES

## CANI-BIKE

Canibike is practised with a cyclist and one or more dogs attached to the bike. It is practised in contrast to BIKEJOERING in a relaxed ride mode, with the dog running sideways and not applying any traction.

## CANICROSS

CaniCross is about running on the pull with the help of one or more dogs connected to the front of the runner by an elastic line. A hip belt helps the runner to run in optimal conditions and with maximum safety.

## CANITRAIL

Cani Trail is a similar sport to CaniCross, but it does not take place on the same terrain. Cani Trail is practised in the mountains, where it is possible to run as well as hike, overcoming a large difference in altitude. In dangerous places, the dog can run free.

## SKIJOERING

Skijoering is practised with one or more dogs, pulling a cross-country skier across the snow. Skijoering requires the dog to actively pull in order to pick up speed, but of course the dog can also run sideways as part of a simple walk. This sport is practised in winter and has numerous variations such as snowshoeing with a dog, white CaniCross or the sled dog sport.

## CANI-JOGGING

Canijogging differs from canicross in that the dog trots alongside or in front of its owner under a light pull. The dog therefore adapts to the pace of the runner. So there is neither a strong pull nor excessive speed for the runner. This practice is ideal as a leisure activity where you can have a lot of fun with your dog at a relaxed pace.

## SCOOTER

Scooter is a sport practised with one or more dogs. A special scooter is connected to the dog with the help of an elastic leash.

There are two ways of practising this sport:

- When walking: stable scooter, dog next to or with a slight pull in front of it.
- During sport: off-road scooter, dog with strong pull in front.

## CANI-HIKING

CANI hiking or Hiking as an outdoor activity with the dog. It is similar to Canimarche, but differs in that it is a more intense hike with or without a difference in altitude, accompanied by a dog and pulled with the help of an elastic leash.

## CANI-MARCHE

Similar to Canicross in practice, Canimarche is an activity based on walking, accompanied and pulled by one or more dogs using an elastic line. It's an easy activity, open to everyone.

## BIKEJOERING

Bikejoering is practised with a cyclist and one or more dogs attached to the bike. In the sporty version: the dog is in front, with a strong pull.

*Ranges dedicated to sporting activities with your dog*

## THE UPKA RANGE

The **UPKA** range offers the **STYLE** series: a range of design accessories for dogs intended for leisure activities. The **UPKA STYLE** set consists of a hip belt, a harness and a versatile bungee lead to accompany you in your daily outdoor activities. With this reliable equipment, designed with respect and comfort for the dog, you can have a lot of fun with your dog in complete safety.

The **STYLE** series accompanies you during many sports or outdoor activities: Hiking, water sports (paddling, canoeing...), trips to the mountains, city strolls or even walks in the countryside with your four-legged friend. Find out more about our products on **page 36**.

## THE KHAN RANGE

Designed with the comfort and well-being of dogs in mind, the **KHAN** range offers footwear specifically designed for dogs' paws and to protect their pads when walking on difficult surfaces. Two special models were developed in parallel: **PAD N'PROTECT AIR** and the **PAD N'PROTECT POLAR**.

The **PAD N'PROTECT AIR** and **PAD N'PROTECT POLAR** dog shoes offer a unique design that respects the morphology of the dog's paws. They are made of technical, reliable and durable materials to meet the challenges of outdoor conditions: hot floors in summer, cold and wet floors in winter and uneven floors on which the dog could injure itself. Discover the features on **page 42**.

## GOOD TO KNOW

It is better to use the smaller Size if the measurement of the dog's neck circumference is between two Sizes.

with the **ALM** and **ONE** harnesses, fluttering of the harness when standing (with out pulling) is completely normal, as they are pull harnesses.

neck width (A)      chest circumference (B)

## MEASURING THE SIZE OF HARNESSES

The Size of the harness is measured with a flexible measuring tape at the lowest point of the neck. Choose the Size of the dog's harness by measuring A and B as shown in the illustration.

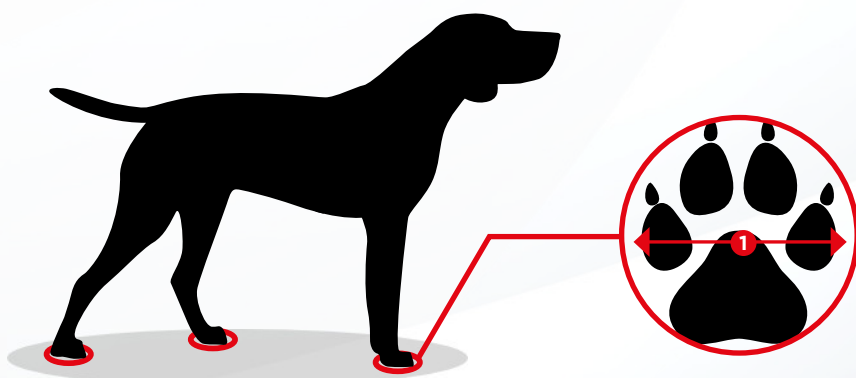

COMFORT TREK				UKPA				KHAN

PRODUCT RANGE ALM

## REFLECTIVE EDGE

Incorporates a reflective edge to ensure visibility at night in a variety of light conditions.

## ZIPPER

pocket with zip, into which items such as smartphones, keys etc. can be inserted.

## ADJUSTABLE LEG STRAPS

Two removable and adjustable straps designed to position the hip belt at the level of the gluteal muscles, optimising the centre of gravity.

## RIPSTOP AND MESH FABRIC

Extremely durable RIPSTOP outer fabric, lined with MESH foam that absorbs moisture and sweat.

## DOUBLE LOOPS

Thanks to the double buckle eyelets, the tensioning straps cannot loosen even with intensive use. In addition, both loops are equipped with two elastic bands that block the excess length of the straps after they have been adjusted.

## STRETCH-BAND

Elastic bands, which connect the lower and the upper part.

## CARABINER

Ultra-light carabiner (37g), which eliminates the pendulum phenomenon of the bungee line and ensures a straight posture during the run.

The CANYON hip belt from the ALM range is designed for strong traction as well as for competitions. It meets the extreme requirements in terms of lightness and comfort. The CANYON runner's belt has a unique design with a lower part (traction) connected to the upper part (belt) by elastic straps. It allows to perfectly adapt to the runner's movement and does not cause any discomfort by the dog's pulling force.

Two removable straps are designed to keep the hip belt at the level of the buttocks and thus optimise the centre of gravity. Its unique design provides an adequate pull point on the gluteal muscles, reducing the phenomenon of pressure on the lumbar spine and increasing the traction of the runner. Its light weight (390gr) allows exceptional results while minimising friction and space requirements.

## SPARE PARTS

Spare parts are available for sale in case one of the wear parts is damaged or broken. The carabiner, the pull strap and the leg strap are available individually.

TRACTION STRAP

LEG STRAPS

# HARNES PHOENIX

The PHOENIX harness from the ALM range is designed for **strong traction** as well as for **competition**. It meets the most extreme requirements in terms of lightness and comfort.

Its resistance and performance are perfectly adapted for use in competitions, which demands optimal material qualities.

## GOOD TO KNOW:

The **PHOENIX harness** is the only X-BACK harness that is fully adjustable to fit almost any dog anatomy.

The main feature of PHOENIX is the use of the shape and technique of an **"X-BACK" traction harness** with the advantage that all 5 essential parts of the harness can be adjusted. The harness adapts perfectly to your dog's body even under intensive traction.

The **X-BACK harness** can be used for competitions or intensive training, but is not suitable for normal walks (without pulling).

Without active pulling of the dog, fluttering of the harness is completely normal.

# HARNESS PHOENIX

## POLYESTER FABRIC WITH MESH LINING

An ultra-durable polyester shell that is lined with moisture absorbing MESH foam lining.

## DORSAL ADJUSTMENT

Settings for the connection of the back sections ensure that the harness fits snugly against the dog's body.

## NECK WIDTH ADJUSTMENT

Adjustments on both sides of the neck adjust the neck width of the harness to the dog.

## BELLY ADJUSTMENT

Adjustments which adjust the belly section so that the harness straps are in the correct position on both sides of the dog.

## LATERAL ADJUSTMENT

This adjustment ensures the lateral connection between the belly part of the harness and the upper part of the neck in such a way, that the percentage of tension between the straps connecting the lower part of the neck and the the upper part of the neck is approximately equal.

## CHEST ADJUSTMENT

Adjusts the distance between the two abdominal straps, which provide maximum support depending on the shape of the chest and prevent the canicross harness from twisting sideways.

## SOFT PLASTIC

The materials used for the adjustment buckles are made of soft plastic, and will not cause any discomfort or injury to the dog.

# BUNGEE LINES OPALE

PRODUCT RANGE ALM

The OPALE lines from the ALM range are bungee lines, which are designed for strong traction forces as well as for competitions. They meet the most extreme demands in terms of lightness and comfort.

Their robustness and performance are perfectly adapted to the use in competitions, where optimal material qualities are required. When developing the OPALE bungee line, two criteria were taken into account in order to select the right type of leash: the weight and the pulling force of the dog.

**Leash size max 190 cm**  
(Canicross, Canitrail)

**Leash size max 240cm**  
(CaniVTT, Canitrottinette, Skijoeing)

Weight : 195gr

**ELASTICITY/KNOTS**

The knots of the I-DOG pull cords contain an elastic part, which acts like a spring and a webbing that encloses this part. If the knot loosens, the lanyard no longer has the original elasticity. You then have to push the elastic band into the the webbing and retie the knot in its original place.

**FASTENING LOOP**

The OPALE traction line 240cm has a fastening loop with which it can be attached to the stem of a bicycle or scooter. The loop has a diameter of 15cm and is made of the identical fabric of the bungee line. The attachment loop of the OPALE 190cm line is used to attach it to the carabiner of the running belt. This loop has a diameter of 5cm.

**SPARE PARTS**

Spare parts are available for sale in case wearing parts get damaged or broken. The carabiner hook is also available as a single part.

**HANDGRIP**

The OPALE bungee rope has a handle on the carabiner side to keep your dog as close as possible, especially when starting for competitions.

**CARABINER**

The OPALE traction line is equipped with an ultra-light (28 g) carabiner with a safety locking system.

\*RRP Recommended retail price

CARABINER:  
The OPALE bungee lines are approved by all canicross associations.

# BIKEJÖRING ANTENNA LINK

The LINK bike antenna from the ALM range has been developed to create a connection between the dog and the bike or scooter while practicing CaniBike or Bikejoering. Thanks to the 50cm shaft of the LINK antenna, the bungee line is held securely over the wheels of the bike. Its resistance and innovative design guarantee maximum safety during the activity.

## RUBBER DAMPER

Rubber damper that absorbs the changes of direction and the impulses of the and the impulses of the dog. Provides optimum comfort for a feeling and optimised performance.

## CLOSED RING

Closed ring with an internal diameter of 50mm at the end to allow any bungee line to fit through, minimising technical limits and simplifying practice.

The dog can then pull with maximum safety.

## L-ANGLE PIECE

Main part with unique concept and design. Attaches to the handlebar stem and is fastened by tightening the upper screw of the the upper bolt of the stem end and the side bolts of the handlebars L shape that allows for downward offset, avoiding collisions. The part is designed for 29mm tubes (optional 25.7mm ring available) and is removable.

# HARNESS X-BACK ONE

The X-BACK ONE harness from the ONE product range is a harness that has been specially designed for dogs that engage in intense sporting activity with their owner.

The X-BACK ONE harness is ultra-lightweight (from 200 grams) and is designed to absorb the maximum pulling force of your dog without subjecting him to the stresses and strains of these sporting activities.

The harness is suitable for most dogs: Nordic dogs, German shepherds, hunting dogs, mountain dogs, retrievers etc. The X-BACK harness can be used for competitions or intensive training, but is not suitable for walks (without pulling).

The fluttering of the harness when standing without pulling is completely normal.

## GOOD TO KNOW:

In the event that your harness does not fit properly, I-DOG offers a tailor made service where your X-BACK ONE harness is custom-fitted.

See **page 23** for more information.

### CHEST AND NECK ADJUSTMENT:

This adjustment allows the harness to be optimally adjusted to maintain freedom of movement and prevent breathing difficulties. This also determines the position of the dog harness.

**Colors :** 

### Size:

XXXS - XXS - XS - S - M - L - XL  
See sizechart p10-11.

**RRP:** 46.00€

### item no. :

I050XXXS - I050XXS - I050XS -  
I050S - I050M - I050L - I050XL

### TRACTION LOOP

Traction rope loop with a diameter of 5 cm for to hook in canicross or bungee line.

# HARNESS X-BACK ONE

## TRACTION LOOP

Traction rope loop with a diameter of 5 cm for to hook in canicross or bungee line.

## MESH LINING

Padding with mesh foam, guarantees maximum comfort for the dog during the run.

## DORSAL ADJUSTMENT

The X-BACK-ONE harness is now available with adjustable straps, in the form of an "X" in the back area. They ensure a good distribution of the pressure points and prevent rotational movements.

## VISIBILITY

The neon orange colour of the ONE dog's harness ensures maximum visibility. A reflective rim lining ensures also your dog's safety at night.

## CHEST AND NECK ADJUSTMENT:

This adjustment allows the harness to be optimally adjusted to maintain freedom of movement and prevent breathing difficulties. This adjustment also determines the positioning of the harness.

## SPARE PARTS

Spare parts are available for sale in case one of the wearing parts should break. The traction loop is also available as a single part.

PRODUCT RANGE ONE

# | BUNGEE LINE ONE

The ONE bungee leash from the ONE product range was developed to meet the requirements of dogs of dogs that are involved in intensive sporting activities with their owners.

The ONE bungee rope is 150cm long when relaxed and 195cm long at maximum tension. With this the ONE bungee line fully complies with the requirements of the canicross associations. Its strength and performance are perfectly suited for use in competitions, where optimum material material properties are required.

PRODUCT RANGE ONE

Colors : 

Size:  
one size 150/195 cm

RRP:  
21.90€

item no.: I290

## ELASTICITY

Equipped with a tubular webbing with a round shock absorber, which provides optimum hardness and allows the use for dogs with a weight of more than 15 kg. Allows good control of the impulses caused by the impulses caused by the dog.

## SNAP HOOKS

Panic snap hooks, with which the dog can be quickly released in dangerous situations.

## KNOT OF THE BUNGEE LINE

Consists of an elastic part that serves as a spring and a webbing that encloses this part. If the knot comes loose, the leash will no longer have its original elasticity. You must then push the elastic into the webbing and retie the knot in its original place.

# CUSTOM MADE X-BACK ONE-HARNESS

Dogs, depending on their breed, have different morphologies that may not match the harness sizes available on the market. Thanks to the X-Back One harness straps that we offer, you can adapt the harness exactly to your dog's morphology so that it fits perfectly. the harness to your dog's morphology, so that your dog's health and well-being are your dog's health and well-being.

Please note that the customisation of the X-Back One harness is offered exclusively for this model.

- Belt shortening A/A' or Repositioning on webbing D.
- Belt shortening D/D' or Repositioning on webbing D.
- Belt shortening C/C' or Repositioning on webbing D.
- Repositioning on webbing G.
- Repositioning on webbing F.

## How do I know if I need an adjustment?

If the harness corresponds to most of the dog's measurements but some of them do not fit perfectly are not perfectly adjusted and/or several pressure points are badly positioned.

## What should I do?

Contact our approved sewing workshop, which specialises in this type of work, for an assessment and an estimate.

PRODUCT RANGE RAIDLIGHT

## MESH FABRIC

Designed entirely in mesh fabric. It eliminates the effects of perspiration, it is lightweight, comfortable and guarantees extreme flexibility of movement in your sporting discipline.

## CONNECTION RING

Ultra-light, sliding metal ring, which ensures straight-angled alignment during the run.

## ADJUSTABLE LEG STRAPS

Two adjustable leg straps designed to adjust the belt at the level of the the buttocks, optimising the centre of gravity.

## ADJUSTABLE DRAWSTRING

Adjustable drawstring with double eyelets on the hip belt (wear part also available separately as a replacement).

## ADJUSTABLE HIP SIZE

Buckle with which the Size can be can be adjusted. Suitable for adults, but also for children from the age of 8. Adjustable from 90-120cm.

## BACK POCKET

Additional zipped pocket (available as an option) in which items such as a smartphone, keys, etc. can be placed.

## CONNECTING RUBBER BANDS

Rubber bands through which the lower part (train) with the upper part (belt) is connected. The girdle fits perfectly to the movements movement the runner and causes no discomfort.

# HARNESS RAIDLIGHT

The RAIDLIGHT harness was developed in close cooperation between the canicross specialist I-DOG and the trail running brand RAIDLIGHT. The unique design of the products in the RAIDLIGHT product range allows you to use it for sporting activities on the CaniTrail or for a traditional a walk without traction.

I-DOG and RAIDLIGHT are well aware of the demands of trail running and have therefore developed very light, comfortable and hard-wearing products that perfectly meet these requirements for you and your dog.

The RAIDLIGHT harness allows you to adjust it perfectly to the shape of your dog's body using 4 adjustment points on the neck, flanks, belly and removable pull strap.

## DUAL USE:

If you want to use the harness for pulling during cani-jogging, you can attach the RAIDLIGHT pull leash to the detachable pull straps. If, on the other hand, you only want to use the harness for walking without pulling, you can remove the pull straps and attach your normal leash to one of the two rings on the back or belly of the harness.

For intense exercise or competition, I-DOG recommends using the ONE or ALM product lines.

## SPARE PARTS

Spare parts are available for sale should any of the wear parts become damaged or broken. The the pull cord loop and pull straps are available individually.

# HARNESS RAIDLIGHT

## REMOVABLE TRACTION STRAPS

For use without traction, remove the detachable straps and use one of the three attachment points on the harness.

## LATERAL ADJUSTMENT

Refines the lateral connection between the lower and the upper part of the harness. It makes it easier to put on the dog.

## ADJUSTMENT EYE

It ensures that the tensioning straps do not loosen during intensive use.

## BELLY ADJUSTMENT

Adjusts the harness straps to prevent the harness from twisting due to the dog's movements.

## REFLECTIVE EDGE

Incorporated reflective edge to make the dog highly visible at night under different light conditions.

## ERGONOMIC HANDLE

Better grip without risk of injury to the dog. Allows the dog to be restrained in an emergency..

## FASTENING EYELET

Allows the attachment of a leash or bungee line.

## NECK GIRTH ADJUSTMENT

Adjustment on both sides of the neck to set the neck circumference for the dog.

## ANTI-TRACTION-RING

Helps you to guide your dog without pulling. It is also used as part of dog training.

## SOFT PLASTIC

The adjustment buckles are made of soft plastic and do not cause any no discomfort or injury to the dog.

PRODUCT RANGE RAIDLIGHT

## ANTI-TRACTION-RING

Helps you to guide your dog without pulling. It is also used as part of dog training..

## SUSPENSION OF PULL STRAPS

The pull straps can be removed for walks where the dog is not running on the pull.

# RAIDLIGHT BUNGEE LINE

The RAIDLIGHT product line was developed in close cooperation between the RAIDLIGHT and I-DOG brands. I-DOG specialises in canicross and RAIDLIGHT in trail running. It is ideal for practising cani-trail or canicross.

The RAIDLIGHT bungee line has two carabiners, one at each end, so it can be hooked onto both the RAIDLIGHT dog harness and the RAIDLIGHT hip belt. The freely rotating snap hook also allows it to be used as a traditional leash. It is 130cm long when relaxed and 190cm when tightened to the maximum.

PRODUCT RANGE RAIDLIGHT

Colors :

Size:  
one size 130/190cm

Recommended  
Retail Price:  
45.00€

item no.:  
I28B

## SHOCK ABSORBER

The RAIDLIGHT bungee line is equipped with an elastic tube strap that acts as a damping system. This minimises the impulses caused by the dog.

## TWO HANDLES

The two handles in this leash allow dual use while maintaining quality and comfort for your daily walks as well as for your sporting activities (Cani-Trail, Canicross, Cani-Hiking...).

## CARABINER

carabiner with swivel that allows you to better follow the dog's running path. In the event of a problem, it allows you to free your dog as quickly as possible. It is also called a "quick release".

# BAG FOR HIP BELT RAIDLIGHT

The additional pocket (sold separately with the RAIDLIGHT hip belt) has a unique design and is attached to the back of the hip belt using a detachable strap. This allows you to pull the bag along the length of the hip belt and place it in the middle to optimise your centre of gravity.

Thanks to the flexibility of its fabric, the pocket will adapt to your morphology, matching your running gestures. Adding the extra pocket won't cause any discomfort when running or pulling. The additional pocket features a waterproof zipper that lets you add keys, a smartphone and more.

## SIDE POCKETS

1 pocket for the drinking bottle (comes with backpack-kit) and 2 pockets for stowing small accessories.

## ADJUSTABLE HIP BELT

The COMFORT TREK hip belt is equipped with an adjustable strap so that the belt can be adapted to the runner's morphology. Adjustable length from a minimum of 80cm to a maximum of 132cm.

## DOUBLE LOOPS

Thanks to the double eyelets, the the tensioning straps cannot come loose even with intensive use. In addition, each strap is equipped with two elastic bands, to store excess harness. excess harness.

## ULTRALIGHT CARABINER

Cancels the pendulum phenomenon of the pull line and ensures a straight line pull of the line during the run.

## POLYESTER FABRIC DOUBLE MESH

Outer fabric in ultra-durable polyester. Mesh fabric interior that eliminates the effects of perspiration.

## ADJUSTABLE ELASTIC PULLING STRAP

Can be adjusted according to body type. The elasticity allows for excellent cushioning.

## ADJUSTABLE LEG STRAPS

Two detachable straps designed to hold the running belt at the level of the gluteal muscles, optimising the centre of gravity. They also have a mesh fabric insert.

The COMFORT TREK hip belt is designed for sporting activities such as hiking or even traditional walks.

The COMFORT TREK running belt is equipped with detachable straps and a wide back seat, which allows a suitable pull point in the area of the muscles of the buttocks. This reduces the phenomenon of pressure on the lumbar spine is reduced and the and the traction of the runner is optimised.

Two detachable crotch straps ensure that the harness is held at the level of the gluteal muscles, optimising the centre of gravity. On the traction harness, a snap hook is slidably attached, to better follow the dog's walking path.

The hip belt has a pocket for a water bottle and two side pockets. It is the perfect ally for your trips to the city as well as for your hikes in the your hikes in the mountains or in the countryside.

## SPARE PARTS

Spare parts are available for sale in case any of the wear parts get damaged or broken. The drawstring, carabiner, crotch straps and water bottle are available as individual items.

# | HARNESS COMFORT TREK

The COMFORT TREK harness from the product line of the same name is designed for sporting activities such as mountain hikes or simple walks. Thanks to its strength and performance, the harness meets the most extreme requirements for lightness and comfort.

The main feature of the COMFORT TREK harness is the use of the shape and technology of a traction harness with the indisputable advantage that it can be adjusted at the most important points and can thus be perfectly perfectly to the body of the dog.

The COMFORT TREK harness is designed for sporting activities, optionally equipped with saddle bags for hiking, but also for urban use, e.g. for simple walks in the city.

## GOOD TO KNOW :

If you want to use the harness with moderate pull, e.g. for cani-jogging, you can attach the pull line to the removable pull straps. On the other hand, if you want to use the harness for a simple walk without pulling, you can remove the pull straps and attach your leash or tow line to one of the two rings on the back or belly of the harness.

I-DOG recommends for more intense sports practices or competitions the use of the ONE or ALM product lines.

## SPARE PARTS

Spare parts are available for sale should any of these wear parts become damaged or broken. The eyelet and the strap are available separately.

# HARNESS COMFORT TREK

## BACK ATTACHMENT RING

Second ring, on the back of the dog harness. It allows the attachment of a line or long leash.

## NECK ADJUSTMENT

Adjustment on both sides of the neck to ideally adapt the neck width to the dog.

## ANTI-PULL RING

Anti-pull ring, with which you can walk your dog without having to pull. Also used in the context of dog training.

## POLYESTER FABRIC

Ultra-rugged polyester fabric covered with moisture-absorbing mesh foam lined.

## BAG HOOKS

Attachment points to which separately available saddlebags can be attached. In this way they enable the transport of personal belongings by your dog during your hikes (water bottles, accessories, food, etc.).

## PLASTIC CLIP BUCKLE

Refines the lateral connection between the lower and the upper part of the harness. Makes it easy to put on the dog.

## LATERAL ADJUSTMENT

Adjustment with which the lateral connection between the the belly part of the harness and the upper part of the neck is refined in such a way so that the percentage of pull between the the lower part of the neck and the the ligaments connecting the upper of the neck are approximately equal.

## VENTRAL ADJUSTMENT

Prevents the harness from twisting when the dog moves by precisely adjusting the straps of the harness.

## DETACHABLE CANICROSS STRAP

Adjustable, detachable strap to which you can attach a leash or a bungee line.

The harness is supplied together with the **COMFORT TREK** harness and is also available as an individual spare part.

## ERGONOMIC HANDLE

It is located on the back of the dog. Its function is to provide better access without risk of injury. The handle also allows the dog to be restrained in an emergency.

# BUNGEE LINE COMFORT TREK

The COMFORT TREK bungee leash has been specially developed to meet the requirements of dogs that engage in intensive sporting activity with their owners, both in the city and outdoors.

It is equipped with a double damping system that uses two different elasticities to control the vibrations of the running dog.

The elastic strap consists of a 20 cm long flat part (soft cushioning) and a round elastic strap (harder cushioning). **Two handles** are integrated and different adjustments are possible depending on your needs and intended use. You can wear the leash as a shoulder strap or also around the waist.

Colors:

Size:

178/235 cm

Recommended  
Retail Price:

53.90€

item no.:

I27R

## DOUBLE DAMPING

System with double cushioning. The flat, 20 cm elastic strap provides soft cushioning. The round elastic element provides harder cushioning. This allows you to control your dog's impulses.

## CARABINER

An ultra-light carabiner (28 g) prevents the bungee line from swinging. The pull line thus remains straight during the run.

## ALUMINIUM-ÖSE

The attachment loop is attached to the COMFORT TREK waist belt by means of a carabiner. In order to be able to follow the dog's path better when running, the carabiner of the hip belt is attached to the pull cord in a "floating" manner. Of course, the pull cord can also be used with other dog harnesses from I-DOG.

## SPARE PARTS

Spare parts are available for sale in case one of these wearing parts could be damaged or broken. The carabiner hook is available individually.

# SIDE POCKETS COMFORT TREK

**COMFORT TREK side pockets** from the COMFORT TREK product line are designed to be attached to the COMFORT TREK harness for hiking. They are attached to the back of the harness on both sides of the dog by means of metal hooks. In this way you can carry equipment (food, water bottles, personal items, etc.).

They guarantee maximum comfort for your dog as they are fitted over the ribs and not the shoulders, so they do not cause any discomfort when walking. There are 3 different sizes available, adapted to the dog's morphology.

## SPARE PARTS

Spare parts are available for sale in case one of these wearing parts gets damaged or might break. The water bottle is also available individually.

# PAD N'PROTECT

## ADVANTAGES

### HIGH PERFORMANCE DESIGN

The design is specially adapted to the morphological curve of the dog's paw for maximum comfort.

### VISIBILITY

During your nighttime excursions, the reflective stripes on the shoe ensure better visibility.

### COMFORTABLE AND ADAPTABLE

The PAD N'PROTECT shoes have an optimal fit. Thanks to their Velcro fastening, they can be easily adjusted to your dog's paws.

### DURABILITY

The fabric used is durable and suitable for outdoor use. The soles are flexible and made of 5mm thick rubber.

### THERMO-PERFORMANCE

The synthetic leather upper is breathable and provides the shoes with flexibility and protection. The Soft Shell (POLAR model) and MESH 430gr (AIR model) outer fabrics perfectly meet the thermal protection and breathability requirements of footwear for outdoor activities.

### PROTECTION

In the event of an injury, PAD N'PROTECT shoes protect the dog's footpads from outside elements (gravel, earth, etc.) that could cause infection or prevent the injured areas from healing.

With the PAD N'PROTECT shoes from the KHAN range, you can enjoy your outdoor activities with your dog in complete safety. They are indispensable for the comfort and safety of your dog's paws as they protect the pads of your dog during walks and hikes as well as during training on difficult surfaces.

The **PAD N'PROTECT** shoes are available in two versions: **AIR** or **POLAR**, to best suit your dog's need for protection.

- We recommend that you have your products serviced, repaired or adjusted

Regular care in accordance with our cleaning instructions for your products will extend their life and ensure their quality in the long term.

MAINTENANCE

# FREQUENTLY ASKED QUESTIONS

## Can the COMFORT TREK and RAIDLIGHT ranges be used for Canicross?

No, we recommend using the COMFORT TREK and RAIDLIGHT ranges for less intensive activities such as Cani-jogging or Canimarche, with moderate traction. For Canicross, we recommend using the ALM or ONE range, which are perfectly suited to this sport.

## How long is the guarantee on I-DOG products?

I-DOG products are designed and developed under the best possible conditions and by specialists in the field of canine products. All I-DOG products are guaranteed for 5 year guarantee. The I-DOG guarantee will only come into play in the event that, despite all the care taken to care has been taken in the manufacture of these articles, an obvious manufacturing defect prevents their proper use. A pierced or torn product will not be guaranteed. I-DOG declines all in the event of injury to the dog.

## I would like to set up a partnership for my Canicross event. Who should I contact?

We do indeed partner with Canicross events. We provide equipment for your event on the basis of precise specifications. You can contact the [info@x-wild.eu](mailto:info@x-wild.eu) for any partnership requests. because the equipment required is quite different. For Canicross, we recommend using the ALM and/or ONE range. For Canijogging, all our ranges are suitable.

## My pull cord broke during my run, is this normal?

I-DOG products such as the harness drawcord, the drawstring, the crotch straps harness crotch straps, etc. are wearing parts that can deteriorate during use or as a result of poor maintenance. It is essential to check your equipment before you start out and to ensure that it is in good working order. I-DOG declines all responsibility in the event of damage or accidents that could lead to serious consequences.

## What's the difference between Canijogging and Canicross?

These two disciplines have the common feature of being pulled by a dog. The only difference is the pulling force exerted by the dog. In Canicross, the pull is strong and intense, unlike in Canijogging, the pull is light and moderate. It's important to distinguish between these two sports because the equipment required is quite different. For Canicross, we recommend using the ALM and/or ONE range. For Canijogging, all our ranges are suitable.

## I have specific questions about a product. Who should I contact to help me?

First of all, it is of utmost importance that you visit our website: [www.i-dog.eu](http://www.i-dog.eu). There you can find all the information you need: Sizing, product care, warranty, use of the product ranges, etc. You can also access the Youtube channel I-DOG, where you can find explanatory tutorials.

## Where can I find I-DOG products for sale?

You can buy I-DOG products directly from many pet shops and sports shops. You can also find a list of dealers and many pull dog sports webshops at [www.i-dog.eu](http://www.i-dog.eu) or at [www.x-wild.eu](http://www.x-wild.eu).
