

CANIHUNT

DOG ACCESSORIES

CATALOG 2019

CANIHUNT products are manufactured by the French company CANO CONCEPT, which is specialized in dog accessories. The company CANO CONCEPT owns the two brands CANIHUNT and I-DOG.

The research and development with technical characteristics and the high quality of the products are the factors that drive CANO CONCEPT to be the best in their field.

In 2002, Mr. LAURENT CANO equipped his hunting dogs for the upcoming wild boar hunt with protective vests. Being an underdog this time, he is now one of the pioneers and participates in organized hound hunting competitions, which are officially allowed by the breed clubs as well as the canine central.

In 2005, Mr. CANO decided to start manufacturing protective vest under CANO CONCEPT. Thanks to the immense research, material testings and the exchange with hunters using these products, the protective vests improved over the years and are now on top of the technological development. The slogan of CANO CONCEPT has never changed since the start «With field experience you will always be one step ahead.»

PROTECT PRO CANO

PROTECTION VEST

The extrem resistant **PROTECT PRO CANO** vest model has been designed to prevent perforation and abrasion.

For this purpose, **CANIHUNT** choose to add an additional layer of ballistic fabric and an additional protection of the thighs and shoulders, which makes the **PROTECT PRO CANO** vest the most powerful vest on the market in terms of protection and perforation.

COVERED SEAMS

This technique allows us to obtain a greater flexibility and avoids that the dog gets hurt by the edges.

BACK FLAP

The extended back flap prevents in addition to the normal closure the opening of the vest.

INTEGRATED THIGH AND SHOULDER PROTECTION

The **PROTECT PRO CANO** vest integrates additional covers that protect the shoulders and the thighs of your dog in the best way possible.

COMPOSITION OF THE VESTS

OUTSIDE CORDURA 1100 TEX®

Ultra-technically with a RIPSTOP® structure: A tear-resistant fabric that keeps constant even in the most aggressive biotopes.

ANTI-PERFORATION FABRIC 100% POLYETHYLEN

4 layers at the main part (thorax) and 3 layers on the anterior part (neck) for an ultra-performant antiperforation vest, high performance, extreme flexibility and superior handling.

THERMO-REGULATING LINING

The **REGULATOR THERMO** system allows to regulate the temperature of the vest and therefore also the dog's temperature. This system is composed of fleece cotton wool to allow greater comfort.

ZIPPER SYSTEM

In 2008, Cano Concept developed a customizable system, which consists of additional zippers for a better adjustment of the vests to the morphology of the dog. You can add additive slides to the back of the vest. The vest can accept up to 4 additional closures. The vest is composed with two additional zippers.

RIPSTOP FABRIC

The outer covering fabric of the PROTECT PRO CANO vest is a CORDURA 1100 DTEX with a RIPSTOP structure, it is almost tear-proof, it is resistant to most abrasive biotopes, while leaving a very high mobility for dogs thanks to its extreme flexibility. This fabric is treated with a 2 layers induction, which allows the vest to be water-repellent and almost waterproof. This also allows the anti-perforating fabric to be protected from humidity and UV rays. An ultra-resistant sewing thread has been selected to limit its deterioration.

TIGHTENING BUCKLE

The clamping buckle allows to easily place and fix the vest on the dog. Instead of the zippers the buckle allows the adjustment of the right size in an easier way.

ENHANCED STITCHINGS AND DYNEEMA THREADS

The sewing thread used for the PROTECT PRO CANO vest is based on DYNEEMA yarn and has a ultra-powerful cut resistance.

Colour :

Size	T45	T50	T55	T60	T65	T70	T75	T80	T85
circumference of thoracic cavity in cm	45	50	55	60	65	70	75	80	85

NECK LOOPS

Loops are located on the outside of the neck section. Collars can be optionally inserted as additional protection against accidental opening.

REFLECTOR STRIPS

The dog is visible in all situations thanks to the reflective strips on the vest, on which a telephone number can be noted.

PROTECT DOG ARMOR V2

PROTECTION VEST

RUBBER INSERT

The rubber insert allows adding contact pins of various remote trainers to the vest. If the vest is used without an impulse trainer, the supplied collar completely covers the recess and prevents any suspension possibilities.

COVERED SEAMS

This technique allows us to obtain a greater flexibility and avoids that the dog gets hurt by the edges.

TWO NECK EXTENSIONS

Those two neck extensions, which are already delivered with the vest, are removable by velcro strips. The upper neck cover is equipped with an additional loop, which improves the fit of the collars.

COMPOSITION OF THE VESTS

OUTSIDE CORDURA 1100 TEX®

Ultra-technically with a RIPSTOP® structure: A tear-resistant fabric that keeps constant even in the most aggressive biotopes.

ANTI-PERFORATION FABRIC 100% POLYETHYLEN

3 layers at the main part (thorax) and 2 layers on the anterior part (neck) for an ultra-performant antiperforation vest, high performance, extreme flexibility and superior handling.

HEAT-REGULATING OUTLAST® LINING

Consisting of microcapsules, the lining creates a constant microclimate on the skin.

HEAT-REGULATING OUTLAST® LINING

OUTLAST® microcapsules that are included in the lining, absorb the excess body heat of the dog. Even if your dog's temperature drops again, it will release excess heat back to him. The OUTLAST® thermoregulating lining creates a constant microclimate on the dog's skin, improving its well-being.

ADJUSTABLE BUCKLES

The straps can be adjusted to the shape of the dog to ensure a perfect fit and safety. It is important to find the correct fit to prevent the dog from chafing or being disturbed while moving during the hunt. The buckle closure system allows you to adjust the straps up to 15cm.

Size :

Colour :

Size	T45	T50		T55	T60	T65	T70	T75	T80	T85	T90	T95
circumference of thoracic cavity in cm	45	50	50 Teckel	55	60	65	70	75	80	85	90	95

BACK STRAP

The velcro back strap secures the actual closure system on the back of the dog.

EXCHANGEABLE BACK STRAP

The **PROTECT DOG ARMOR® V2** vest comes with an orange back strap. Other colours are available as accessory kits to distinguish several dogs by different colours.

SHOULDER PROTECTION

The **PROTECT DOG ARMOR® V2** vest was developed with a unique cut at shoulder height to ensure optimum protection for your dog.

CROSSED SEAMS

The cross seams and the use of high-strength yarn enhance the cohesion of the vest.

SPECIAL SIZE FOR TECKEL

PROTECT LIGHT

PROTECTION VEST

The **PROTECT LIGHT** protective vest was developed as a flexible, lightweight and resistant vest model.

For this purpose, **CANIHUNT** has chosen a very flexible and light, but also resistant outer fabric. This vest is perfect for dogs with a light stature or for dogs who haven't liked to wear a vest jet.

COMPOSITION OF THE VESTS

ZIPPER SYSTEM

In 2008, Cano Concept used additional zippers to develop a system to improve the size of the vests to fit the anatomy of the dog. In combination with a back strap adapter, the vest can accommodate up to 4 additional zippers. This vest comes with an additional zipper.

QUICK-RELEASE FASTENER

This clamping buckle allows the vest to easily put on the dog and to close the zippers effortlessly.

CROSSED SEAMS

The cross seams and the use of high-strength yarn enhance the cohesion of the vest.

Colour : ■

RIPSTOP FABRIC

The outer cover fabric made of **CORDURA 600 DTEX** with RIPSTOP structure is almost untearable. It is resistant to the thorniest and most aggressive biotopes, but thanks to its extreme flexibility, it allows a very high mobility for the dog. This fabric is treated with 2 induction layers, which makes the vest dirt-repellent and almost waterproof. The anti-perforation fabric protects from moisture and UV rays. An ultra-resistant sewing thread has been selected to minimize abrasion effects.

NECK LOOPS

Loops are located on the outside of the neck section. Collars can be optionally inserted as additional protection against accidental opening.

REFLECTOR STRIPS

The dog is visible in all situations thanks to the reflective strips on the vest, on which a telephone number can be noted.

Size	T45	T50	T55	T60	T65	T70	T75	T80	T85
circumference of thoracic cavity in cm	45	50	55	60	65	70	75	80	85

PROTECT ECO

PROTECTION VEST

The **PROTECT ECO** vest was developed to offer a reasonably priced model. For this purpose **CANIHUNT** has left out some features of the **PROTECT PRO CANO** :

Without a heat-regulating fabric, only with a velcro system and with a modified, shorter cut, **PROTECT ECO** offers despite the attractive price a vest of really high quality.

COMPOSITION OF THE VESTS

OUTER SIDE CORDURA 600 TEX®

Ultra-technically with a RIPSTOP® structure: A tear-resistant, very flexible and lightweight fabric that resists even the most aggressive biotopes.

ANTI-PERFORATION FABRIC

100% POLYETHYLEN

3 layers at the main part (thorax) and 2 layers on the anterior part (neck) for an ultra-performant antiperforation vest, high performance, extreme flexibility and superior handling.

BREATHABLE LINING

VELCRO SYSTEM

The closure consists of wide velcro strips, which hold the vest firmly closed and allow size adjustment.

CROSSED SEAMS

The cross seams and the use of high-strength yarn enhance the cohesion of the vest.

Colour : ■

Size	T45	T50	T55	T60	T65	T70	T75	T80	T85

REFLECTOR STRIPS

The dog is visible in all situations thanks to the reflective strips on the vest, on which a telephone number can be noted.

FLASH VEST V2

SAFETY VEST

FLUORESCENT ORANGE COLOR

The fluorescent orange FLASH vest makes your dog more visible during hunting for you and others (hunters, car...).

ADJUSTABLE STRAPS

Effective closing system, using straps adjustable by plastic buckles. Wide range of adjustment to adapt the vest to your dog's size.

REFLECTOR STRIPS

With the attached reflector strips on the vest, your dog is visible in all situations.

RIPSTOP FABRIC

The outer fabric is extreme resistant and keeps off the most aggressive biotopes (thorns, blackberries).

ACTION-CAM MOUNTING PLATE

The **FLASH V2** vest has a universal mounting bracket for all types of cameras. This vest makes it possible to have hunting scenes filmed by your dog.

The **FLASH** vest is in bright orange. It makes the dog visible and allows to better visualize him while hunting, but also to signal him to others (hunters, car drivers, ...). The FLASH vest increases your dog's safety. The vest protects the dogs against most aggressive biotopes such as briars and thorns.

This new version on the high visibility **FLASH** vest features improvements compared to the V1 : mounting bracket for embedded camera, neck closing system...

NEOPRO VEST **V2**

NEOPRENE-HUNTING VEST

CAMOUFLAGE COLOUR

The NEOPRO V2 is available in one colour : swamp camouflage. This vest provide increased discretion while hunting waterfowl.

MOUNTING BRACKET FOR EMBEDDED CAMERA

The NEOPRO V2 flotation vest comes with an universal mounting bracket allowing you to fix any kind of embedded camera. This vest will let you film hunting sessions with your dog.

NEOPRENE COMPOSITION

The neoprene integrated in the vest keep your dog warm. The vest protect it while hunting in cold weather

ADJUSTABLE STRAPS

Effective closing system, using straps adjustable by plastic buckles. Wide range of adjustment to adapt the vest to your dog's size.

ACCESSORIES KITS

ADDITIONAL ZIPPER 1

He enlarges the chest circumference of the vest in order to adapt it to the physical condition of the dog. Different lengths available.

1

REPLACEABLE BACK FLAP 2

4 different coloured back flaps (pink, yellow, blue and orange) allow you to identify the dogs and distinguish them from each other. The assembly is done by a zipper and other velcro fasteners of very high quality, so that the back flap is lined by the protection layer on the inside of the vest. Only for DOG ARMOR V2.

2

REPAIR - SET 3

With this repair kit you can repair vests that have been damaged by thorns, wild boar impacts or abrasion over time. The elements of the kit consist of the original components of the vest: *outer fabric*, *velcro fastener*, *reflector stripes* and *sewing threads*.

3

FEMALE DOG - BELLY PROTECTION 4

With attaching a velcro fastener this kit allows the protection of the belly and teat area. The kit extends the vest by an average of 10 cm. Only for DOG ARMOR V2 and PRO CANO.

4

GPS TRACKER BAG 5

The GPS tracker bag must be sewn into the inside of the back flap so that any transmitter antennas can be positioned through openings.

5

ADDITIONAL BACK FLAP EXTENSION 6

Some chest circumferences make it necessary to insert an adapter to guarantee exact closing of the back flap. The kit allows an extension of up to 6 cm to the original flap.

SPIKES HARNESS NEW 2019

ANTI ASSAULT HARNESS

METAL PINS

The harness is provided with metal pins. In case of a bite against the dog the pins put off the attacker, by stabbing in his mouth and releasing the wearer of the harness immediately again.

The SPIKES harness can be used by it's own, but also as an overcoat on a protective vest for dogs on a wild boar hunt.

With the increasing of wolf attacks the SPIKES harness was developed for hunting dogs to have a better protection.

A = 46-53cm	A = 53-65cm	A = 65-85cm	A = 80-105cm

The fluorescent orange **SIGNAL HARNESS** is visible from afar and your dog can easily be spotted in action while hunting, by yourself or a third part (other hunters, cars etc...). The animal can be seen from a distance and in all situations with the reflecting band around the harness. This harness allows game researches with bloodhounds.

SIGNAL HARNESS

SIGNAL VEST

FLUORESCENT ORANGE COLOUR

The **SIGNAL harness** is coloured with a fluorescent orange to quickly see the dog in the hunting zone. Including a reflective band in order to keep the dog visible in a dark environment.

RIPTOP FABRIC

The external fabric is super strong and made to resist to the most abrasive biotopes. With the central hook on the back of the harness, you can attach the dog to a lead or a lanyard when searching for game with a bloodhound for instance.

ELASTIC ADJUSTABLE STRAP

The elastic part of the adjustable strap helps the harness to match the dog's morphology and avoid restraining their breathing. The harness interior and lining have been designed to maximise the comfort of the dog. The ergonomics of the design guaranty freedom of movement, when in action or at rest.

COLLARS

COLLARS NEW FABRICATION PROCESS

In order to improve the collars engraving, without risks of damaging the polyester strap, Canihunt innovates and offers a new version of the XTREM collars.

The polyester strap inside the layers of polyurethane (PU) has been move down to make the PU part thicker and allow a deeper engraving and more long lasting.
